

Ephemerides, &c. 756. 6-1
Merlinus Liberatus. 5

BEING AN

ALMANACK

For the Year of our Redemption,

1 7 6 7. *1765*

ing the third year after *Bissextile*, or *Leap-Year*
d from the Creation of the World, according
to the best History, 5716.

d the 75th of our Deliverance by K. William
from Popery, and Arbitrary Government.

But the 71st from the
Horrid, Popish, High-Church, Jacobite Plot.

erein is contained all Things fitting and useful for such a Work, as
Ephemeris of the Daily Motions of the Planets, with their various
Configurations, Aspects, Conjunctions, Lunations, Eclipses, Astrono-
mical, Astrological, Meteorological Observations, the Rising and Setting
of the Sun, Moon, Planets, and fixed Stars, illustrated with Tables of
the Tides, Terms, and Daily Equation of Clocks, Length and Breach,
Increase and Decrease, of Days, Semidiurnal and Seminocturnal Arches
for several Latitudes, a Chronology, Remarks on the Divisions of the
Heavens, with an Essay to find out the Giver of Life, in the Geneth-
ical part of Astrology, &c. &c. The like not extant. With a Na-
tivity exactly rectified, and an Essay on Comets, with a particular
Judgment of a Comet seen in the Year 1766.

To which is prefixed,
The Protestant Remembrancer.

Calculated for the Meridian of *London*,

whose { Longitude } is { 24 } Degrees { 20 } Minutes.
{ Latitude } { 51 } { 32 }

By **JOHN PARTRIDGE.**

Company of STATIONERS.

[Price Stitch'd Nine Pence.]

Some useful Observations touching Natural
Philosophy, and the Excellence of Astrology
being a short Vindication thereof.

THE Design of this, ensuing Discourse is, partly to satisfy the Curious, and partly to remove Ignorance from the Eyes of modest Enquirers into Truth, by a humble (though just) Vindication of starry Influences; the Proceeding shall be thus.

Astrology is an innocent and singular Science, which teaches us to judge of future Events by the Motions of the Heavens, and Bodies therein contained, and not by the Help of any propheticall or diabolical Inspiration, as the Ignorant imagine. Nor think the Stars have Power, or Force, to compel the Will of Man. No, they are natural Causes, and therefore they only incline, they cannot compel, and as the Poet saith,

Fata regunt fatuos, sapiens dominabitur astris.

Fatality rules Fools, Wise Men rule the Stars; whilst they govern themselves by sound Council, and not by Fatalities. And as the learned *Kepler* once said, the Stars can work no Effects upon the Bodies of Men, was there not a strong Principle in their Minds, which did harmonically close with their Influences, and lay hold on all Occasions to effect them; to which agrees the learned *Dr Gell*, once in his Sermon before the Society of Astrologers. There (saith he) *id bruti* in Men that they live so much by Senses that it is almost a strange Thing the Astrologer should predict false, while Men live in a natural Estate. Celestial Bodies have a strange and strong Influence over them: but if Men were so wise as to keep the Laws of God in an universal Obedience, and learn to deny themselves of those they are naturally propence unto; the Heavens would have but little Power over them, because they cannot reach the Faculties of the Soul, and therefore cannot compel the Will or Mind; their immortal Souls would soar in a Sphere infinitely above those things they now obey. I say, could Men attain to this, they would more admire the supreme Being, and have an higher Esteem of his Workmanship.

Nothing

Nothing is more certain, than that all Things were made by Almighty God at first, and thence it is reasonable for us to believe, that He hath the wise Disposol of them all; as also, that every individual Thing was designed for some End or other: Why then should we not think the Sun, Moon and Stars, were created only for us to look on, or to light the Earth? Holy Writ, as well as my own Experience, obliges me to believe the contrary. We are obliged to believe all Things were made for what they are most fit to perform. And then is nothing in nature of Power sufficient to change the Qualities of earthly Bodies, but the sacred Influence of the Celestial World. I mean the Sun, Moon and Stars, who are, undoubtedly, by the wise Architecture of an allsufficient and immortal Deity, placed in sundry Distances, and Spheres above us, for that purpose.

No Man of a common Sense will censure the Astrologian, who judgeth no further of future Events than as they are revealed in the Celestial Bodies, as secondary Causes under God the Author. This we do affirm, that God ordinarily governs that which he makes by those Things as are made, as these inferior Bodies depend upon the superior Causes. We also own, that those second Causes depend upon God, the supreme Cause of all Things. Nor do we pretend, that God governs by these second Causes, as Princes by their inferior Magistrates, to whom they commit all, doing nothing themselves: But we do acknowledge all Things so to subsist and move in God, that if He pleases to withdraw the divine Power from them which he at first gave, and by which they are sustained, not only the celestial, but elemental Part of the World would be discontinued. And though we affirm that God ordinarily governs by Means, yet we confess those Means to be endued with their Virtues, who still continueth and preserveth the same to his Service, but so as when his Will is otherwise. He can work without any of these Means. Wherefore it necessarily follows, that so long as it pleases God to suffer the Course of Nature to proceed without Interruption, our Predictions must be owned true, and not to be frustrated but by God's omnipotent Power, to which the Stars are all Subject

[Of which more in my next]

A Table of the Moon's Age for every Day throughout this present Year 1767. Whereby, with the Help of the next general Tide-Table, the Time of High-Water at all the Places above-mentioned in it are shewn by Inspection.

Explanation of this, and the following Table.

First find the Month in the Head of the Table, and the Day in the First Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Columns is the Time of High Water at all the Places above-mentioned, by Inspection.

Example. January the 20th, I find the Moon to be 20 Days old, and over-against 20 in the first Col. I find 7 Hours 00 Min. in the second Col. 5h. 36' in the third, which is the Time of High Water at all those Places mentioned above in the 2d and 3d Columns. Et sic de ceteris.

Enter this Column with the Moon's Age, and over-against

A general Tide Table, shewing the Time of High Water at all the Places herein mentioned, viz.

A Table of Terms and Returns, for the Year of our Lord 1767.

Hilary Term begins Jan. 23, ends Feb. 12.

Returns or Essoign Days.	Exc.	Ret.	App.	W. D.
In eight Days of <i>St Hilary</i> , Jan. 20	21	22	23	Friday
From the Day of <i>St Hilary</i> in 15 Days, 27	28	29	30	Friday
On the morrow of Purif. of bl. V. Mary, Feb. 3	4	5	6	Friday
In eight Days of the Purif. of bl. V. Mary, 9	10	11	12	Thursday

Easter Term begins May 6. ends June 1.

From the Day of <i>Easter</i> in 15 Days, May 3	4	5	6	Wedn.
From the Day of <i>Easter</i> in 3 Weeks, 10	11	12	13	Wedn.
From the Day of <i>Easter</i> in 1 Month, 17	18	19	20	Wedn.
From the Day of <i>Easter</i> in 5 Weeks, 24	25	26	27	Wedn.
On the morrow after the <i>Ascension</i> , 29	30	31	J1	Mon.

Trinity Term begins June 19, ends July 8.

On the morrow of the holy <i>Trinity</i> , June 15	16	17	19	Frid.
In eight Days of the holy <i>Trinity</i> , 21	22	23	24	Wedn.
From the Day of holy <i>Trinity</i> in 15 Days, 28	29	30	J1	Wedn.
From the Day of holy <i>Trinity</i> in 3 Weeks, J	6	7	8	Wedn.

Michaelmas Term begins Nov. 6, ends Nov. 28.

On the morrow of <i>All-Souls</i> , Nov. 3	4	5	6	Frid.
On the morrow of <i>St Martin</i> , 12	13	14	16	Mond.
In eight Days of <i>St Martin</i> , 18	19	20	21	Saturd.
In 15 Days of <i>St Martin</i> , 25	26	27	28	Saturd.

N B. No Sittings in *Westminster-Hall* on *Ascension-Day*
Midsummer-Day, and the 2d of *February*.

The *Exchequer* opens eight Days before any Term begins,
except *Trinity*, before which it opens but four Days.

Note, That the first and last Days of every Term, are the
first and last Days of Appearance.

'Tis sacred Justice, and (Life's Guardian) Law,
Protects the Good, and keeps the Bad in Awe.

If any do by Craft, abuse the same,

The Men, not the Profession, are to blame.

Let us be honest, study Love and Peace,

The Lawyers soon will find their Fees decrease.

January hath XXXI Days.

On the seven Planets and their Significations.

Co'd natur'd Saturn, ponderous moving light,
Sly Falsefier, Dark 'an horn of the Night;
Rules o'er deep Vaults, and darksome Dens below.
Where noisome Herbs (with strangling Scents) do grow:
Patron of Tillage, greater Beasts and Cattle,
Hard Labours, Dredgers, Lord of Land and Battel.

March hath XXXI Days.

He signifies the Peace and happy State,
Of Commonwealths, and Men subordinate;
The Clergy, Church Affairs, the public Good,
And stays the Effusion (too) of Christian Blood.
The grand Effects fomented by this Star,
Are opposite to Dearth, Division, War.

Many are the configurations of the celestial wanderers, in this month.

On the 5th of this Month 1722, was born the Princess of Hesse.

δ enters π, and presently □'s ♄, and joins h; various reports are spread abroad out of design to promote mischief.

On the 19th Day of this Month 1749, was born the hopeful Princess *Louisa Anne*.

On the 25th Day of this Month in the year 1739, was born the hopeful Prince *Edward Augustus*, 2d Son of her Royal Highness the Princess Dowager of *Wales*, now Duke of *York*.

April hath XXX Days.

See how the Summer's Goddesses appear,
 When Jupiter's made Ruler of the Year:
 The next superior Planet of the seven,
 Is busy Mars, that fiery Spark of Heaven;
 To whose Command, and Patronage allot,
 Contentions, Wars, Jars, Plunders, and what not.

1						3 59	2 10	10 35	Certainly we may expect many contradictory councils, and actions now depending; many people perplexed with fear, and dissatisfied: Small hopes of a reconciliation of former differences, notwithstanding all endeavours for it. The cross influences of the heavenly bodies may instigate, or influence strange projects, or whimsies, in the vulgar man's head. And now the greatest politicians will be sufficiently active also, to promote their own designs and interest; but let them beware of the arrows of Heaven.

May hath XXXI Days.

He signifies Disease that quickly kills,
Engines of War, Fire-works, and sun burnt Hills;
Great Heat and Drought, his Influence lets fall,
When o'er the Year he rules as Cardinal.
Majestic Sol, that full-eyed Lamp of Day,
With golden Locks (each Lock a burnish'd Ray).

July hath XXXI Days.

Gold, Pearl and precious Minerals (no few)
 Prefages of his Influence do shew;
 The which (as cordial Antidotes) destroy
 Distempers that the vital Parts annoy.
 His Beams do to the Spring Refreshment give,
 Causing each single languish'd Vegitive to live.

October hath XXXI Days.

Of Linnen, costly Si ks and (what ensues.)
Such as do sweet Perfumes and Odours use.
Her precious Herbs, bearing a flagrant Flower,
To fortify the generative Power.
Tenderey'd, Hermes that creeps near the Sun,
And from his Prefence dares not far to run.

1	12	6	6	0	13		10 36	6 44	10 46	Here are two Squares near the beginning of this Month, one between Saturn and Mercury, the other of Saturn & Mars, from cardinal Signs which makes me to say, the Courts of Princes are molested with Factions, one great Officer envies another, but Die quibus, in Terris? Italy is much concerned, & its chief City also, fundry great & powerful Persons accused; much Envy & Hatred among the great Ones; as well in the Church of Rome, as elsewhere; perhaps his Holiness yields to the Grave, & a troublesome Election succeeds.

Observations.

Jacunditas Cor-
 dilest vitæ hominis
 The 5th of this
 Month, 1666, was
 the Popish Pow-
 der Plot, which
 by true Protest-
 ants ought never
 to be forgot.

The 7th of this
 Month, 1745, was
 born the hopeful
 Prince Henry Fre-
 derick, 4th Son of
 her Royal High-
 ness the Princess
 Dowager of Wales.
 The 25th of this
 Month 1743, was
 born the hopeful
 Duke of Glouces-
 ter, third Son of
 her Royal High-
 ness the Princess
 Dowager of Wales
 And on the 30th
 1719, was born
 her Royal High-
 ness the Princess
 Dowager of Wales.

December hath XXXI Days.

His spicy Herbs do fortify the Brain.
 Against Distempers that annoy the same.
 Luna the Goddess of the silent Night,
 Phæbe Diana various Flux of Light
 Denotes the chief of Females that possess,
 Command, and rule over household Busines,

N.B. In the Kalendar Part you will find the Planets South
 ing inserted to several Days in each Month; and by this Ta-
 ble you may easily find their Rising and Setting: First find the
 Longitude for the Day proposed, with which enter this Ta-
 ble, and take out the Semidiurnal Arch thereof, which be-
 ing added to the Time of Southing, gives the Setting; but
 subtracted the Rising.

P A R T R I D G E, 1767.

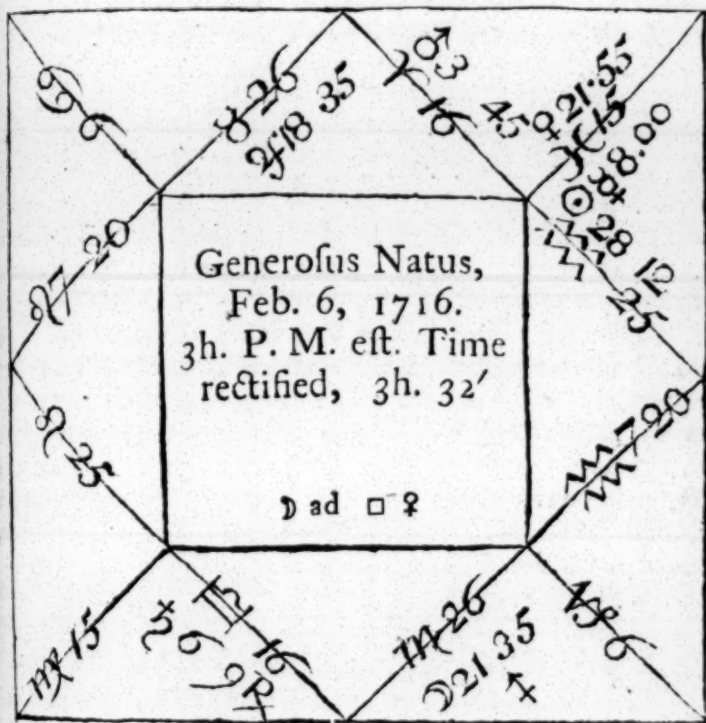

A further Continuation of the Genethliacal Astrology.

I Promised in my last, to give you a true rectification of a Nativity, that is, to bring the estimate time of birth to the true time; provided the estimate be within the space of two hours from truth. And by so doing, I shall neither adhere to the much applauded rule called the Scale, or Trutime of Hermes, nor the Animodar of Ptolemy, nor the incertainty of clocks or watches, nor even the accidents of the native, which hath hitherto been accounted the most rational, for often the accidents are applied to wrong significators, and likewise the native must live some time before any accidents may happen, that may rectify the ascendent. But this rule I shall give you, may be put into practice at any time, and, I am of opinion, was never printed in English before; neither was it known to our modern students in astrology.

Now the rule is this, when you have erected your figure to the estimate time of Birth, observe if either of the luminaries be in the center of any of the three prime angles, viz. the Ascendent, or Medium Cæli, or Seventh, or near them bring either of them to the cusp of the angle, and make that the true time; if they, or neither, be near the cusp, then bring them to a right parallel from angles, and make that the true time; if these be not so, or nearly so, observe the two fortunes, viz. Jupiter, or Venus, and see whether they be situated as above specified, viz. in the center of the angles or in a right parallel, with either of the luminaries, viz. the Sun by day, or the Moon by night; if these be not found so, observe the two infortunes, viz. Saturn, or Mars, and observe if either of them be situated as above, viz. either in the center of the angles, or in a right parallel with the luminaries, make that which is so placed the prorogator of life, but the infortunes generally cut off life in a short time, even in infancy, or at least in the first stage of life. The Fortunes or the Luminaries in Aspect, as aforementioned, do strengthen and prolong life, even to maturity, or, it may be, to old age according to their power or weakness at the nativity; for

P A R T R I D G E, 1767.

My author says he has never found this rule to fail in three hundred examples, which he exhibited to the world above two Centuries since, in the Latin tongue. Now I will proceed from precept to example, in the nativity of a gentleman, one of my particular acquaintance, who has given me leave to publish it to the world. Now the estimate time of the birth was February the 6th, 1716, at 3 hours p. m. the Planets are placed as in the following scheme.

Lat. Planets.		
♄	1	35 N.
♄	0	48 S.
♄	0	27 S.
♀	1	14 S.
♄	1	10 S.
♄	3	48 N.

Declin.		
♄	0	32 S.
♄	16	37 N.
♄	1	5 N.
☉	12	8 S.
♀	4	20 S.
♄	9	4 S.
♄	20	27 S.

Now

PARTRIDGE, 1767.

Now you may observe, that in this figure neither of the Luminaries, or the Fortunes, or the Infortunes are in the center of the angles, therefore the figure wanted a rectification; which to do must be my business to explain. Now at the estimate time, the Sun was distant from the M. Celi 47 deg. 48 min. the Moon from the Imum Celi 65 deg. 36 min. but in the space of 32 min. the Sun was distant from the tenth 56 deg. 8 min. the Moon from the 4th the same. Therefore I conclude the time of Birth was 32 min. after three, at which instant, 13 deg. and $\frac{1}{2}$ of Ω will ascend, and about 25 deg. of γ will culminate. And, as I said before, the Luminaries with themselves, or with the Fortunes, and not being hurt by the malefics, as now, giving the impulse of life, generally gives health, and length of life to maturity, if not to old age, as in this example, and many more, which I could give, had I leisure to do it; but this shall suffice, because it agrees with my rule, and the native has told me he has been free hitherto (with thanks to heaven) from any chronic, or long diseases, but has been afflicted with sharp cholicky pains at different intervals, which the figure very aptly denotes. And so much for my promise in the rectification of nativities. But if any of my readers do mistake any thing that I have now, or some time ago writ upon this subject, may have their opinions cleared up, by sending a letter, post paid, and directed for Thomas Wright, at Eaton, near Belvoir Castle, Leicestershire.

A brief Discourse of Comets, &c.

THAT a Comet appeared in the month of April, the last year, 1766, diverse nights together in England, and also in some other parts of Europe, I presume none can deny; and if we may credit history, there has appeared since Noah's Flood, to this present year, not less than one hundred and sixty-nine Comets, which have had (most of them) prodigious effects, as we ourselves, in this present age can witness. For as often as Comets appear, they portend some mutations, destructions, or calamities.

Dr Bain-

P A R T R I D G E, 1767.

Dr Bainbridge tells us, that Comets are to some sent as heralds of wrath, but to others the joyful embassadors of peace and mercy. What this last Comet doth in particular signify, is not possible to declare without divine inspiration,

*God only knows, and none but He,
What is, what was, and what shall be.*

The final cause of Comets is, from the signification of them, which chiefly stir up mens minds, and produceth great admiration in them, and therefore when men behold them, they are astonished and troubled, because that the observation of many ages witness, the dire and sad events which have succeeded their apparition, as famine, plague, dearth, destruction of cities, and mutations of Commonwealths, and other publick calamities. And it is well said of One, that God speaketh with men, not only with the tongues of men, by prophets, apostles, and teachers, but sometimes also with the very elements, composed or wrought into diverse forms and shapes, there being also a theological end of sending Comets, as well as natural and political.

Some authors have attempted to give these reasons why wars, dearths, famine, &c. should be the effects of Comets, viz. that Comets, they consist of many hot and dry exhalations, and they do not only stir up heat, and dry, and parch the air, and thereby produce drougth and barrenness, but also the bodies of living creatures, upon the distemper of the air, are considerably hurt, by drying up their radical moisture, and suffering suffocation, through the poisonous breathings which the bellows of the body frequently suck in, to their great detriment, whence proceeds sickness, plagues, and much mortality. Moreover, that they should usher in wars, seditions, changes of kingdoms, &c. may also proceed from the same cause, for when the air is sufficiently heated, then it is very apt so to disorder and dry up the blood in human bodies, that thereby great store of red and adust choler may be purchased, and this stirreth up anger, with the thoughts of many furious and violent actions, and consequently war, and from war ariseth victory, from victory proceedeth change of Commonwealths, and translations
of

P A R T R I D G E, 1767.

of kingdoms, with change of laws and religions. Unto which may be added, That because great personages live more delicately than other men, and feed more daintily, having as many new fashions in their diets as their clothes, that their bodies therefore are more subject to infection, and will take in the poison of an infectious air before (or much sooner) than more temperate livers, whereupon necessity urges, that they should expire sooner in such a calamity than other people.

Let us meditate upon these things as christians. And although naturalists and astrologians, render the natural and physical causes and portents of comets, signs and wonders, which appear in heaven; let them be to us, I say, as so many trumpets, heralds, and fore runners of the justice of God, who, when He shews these wonders in heaven, he doth advertise men, that they persist not in their filthy, corrupt, and sinful courses; that we should return there from, to his infinite and most merciful goodness. And when they hang over our heads, they appear as if God held his rod over us, threatening to scourge us; or reacheth his hand to us to call us by such signs to change our lives, and leave our execrable vices, to the end, that through his mercy we may obtain mercy for our transgressions.

Judicium Astrologicum, pro Anno 1767,

Being an Astrological Judgment for the Year 1767.

I. *Of the Winter Quarter,*

WHICH begins on Sunday the 21st day of December 1766, at 12 minutes past 6 in the evening, apparent time, when 3 degrees of Aries culminates, and 29 degrees of Cancer ascends at this ingress. We have the most malignant aspects among the erratics, that I am of opinion, the like has not been in this century; for first, there is a Square of the two Superiors, viz. Saturn and Jupiter, and likewise a Square of Saturn, Jupiter, and Mars to Mercury.

A Square

PARTRIDGE, 1767.

A Square of Saturn and Mars, an Opposition of the Sun and Saturn ; an Opposition of Jupiter and Mars, with four other Squares between the Sun and Jupiter, the Sun and Mars, Jupiter and Venus, Mars and Venus, with others of less signification among the inferiors. Now might I quote my authors words, and from them deliver my own opinion, a whole volume might be written upon the subject, but as my narrow scantling of three sheets of paper are almost at an end, I must deliver my judgment in a few words ; I say, many are the vain fears, which possess the minds of people in general in diverse countries of Europe, much repining, secret whisperings, private combinations, close confederacies, unsettled judgments, male-contented, and resolute to prosecute their obstinate endeavours with great labour, subtilty, and deceit ; they even weary themselves to accomplish their ends and desires. And also there are not only consultations and debates sharply managed, but also many verbal conflicts, and actions at law, rather than those martial.—Old matters, or grudges, are now brought to light, and questioned. Here appears a change of good-will, and former correspondencies amongst friends, and of other persons, formerly living in great friendship and unity ; but now instead of love, arises a weariness and loathing of each others company, with a general disrespect, and consequently much ill will also. We may assuredly expect to hear many false reports, and subtile frauds and villanies cunningly acted and carried on ; many robberies, and unnatural murders committed in the east and north east parts.—More than ordinary debates and wranglings about words, which may occasion some former leagues and articles, &c. to be new inspected and further examined, in order to the concluding certain differences now aggravated, and notably fomented in many countries of Europe.

As to the diseases of this quarter, they are likely to be many. Chronical distempers and infirmities do now afflict in general, and many aged people end their days thereby. Also such diseases which arise from a collection, or abundance of humours, and the corruptions or putrefaction of blood. Many are afflicted with rotten coughs, catarrhs, stiffness in the joints, great pains in the head and ears, with

PARTRIDGE, 1767.

with imposthumes therein, putrid fevers. *Cum multis aliis.*

The inclination of the air, or season of the year, we conjecture, will be various, much rain, snow, or moist weather, and consequently inundations, &c. many foggy mists, with cloudy, dark, close, sharp air; also frequent gusts, with east and north east winds, unwholsome for mankind. And thus I conclude my judgment for the winter quarter.

II. *Of the Spring Quarter.*

THIS pleasant quarter commences on Friday, March 20th, at 4 min. past 8 at night, apparent time, when 29 deg. of Cancer is on the mid-heaven, and 22 deg. of Libra ascends. At this Ingress we have Venus and Mercury conjoined in the 6th, and both in Sextile, to Saturn in the 8th. But the most predominant Aspects are the approaching Square of Saturn and Jupiter from Gemini and Virgo, and likewise the Square of Jupiter and Mars, and a Conjunction of Saturn and Mars in Gemini; and to be the better understood, I will enlarge on this subject, and in order to this matter, I will lay this sentence down as an Axiom. That all the Conjunctions of Saturn and Mars are of a malefic tendency, and inimical to human nature, but some more than others, from the violence of the parts of heaven in which they are celebrated. And this, if need be, might be proved by experience, and examples, in a plentiful manner with a little retrospection. In my judgment on these Aspects I shall not trouble you with that pedantic way of quoting texts from a great many authors, though I have them before me, but give you my thoughts in as short and concise a method, as my judgment, and the little room I have will admit, and direct me. I hate a long preamble, where a few words will serve.

I fear a sickly spring; plots about religion; heats, contests and differences between the parties in England, mighty pretences to piety by those that know nothing of the matter. There seems to be a new ferment in the spirits of mankind
tending

PARTRIDGE, 1767.

tending to cruelty. and destruction of one another, as if the
were let loose, not to tempt, but to possess man-
kind with such a temper as is fit for his design. The Devil
is a craftsman at his trade, and fills his journeymens heads
with stately notions about religion. Error is their first prin-
ciple, and pride their height of perfection. It was well said
of one—Be careful not to exasperate any sect of religion.
Rigour, seldom makes ill christians better, but many times
it makes profound hypocrites. Zeal looks well in a private
breast, but moderation is noble and great in a publick state.
Set bounds to your zeal by discretion, to error by truth, to
passion by reason, but to your divisions by charity. Never
contend over passionately for ceremonies (which are but the
suburbs or shadow of religion) to the disquiet of the State
and Church. It is better for the Church and People to be
without some truths, than to have no peace; with which
christian and pious advice, I shall conclude my judgment on
the Spring Quarter.

III. *Of the Summer Quarter,*

WHICH begins at such time as the sun enters the sign
Cancer, which this year is on the 21st of June, at
8 min. after 6 in the evening. when 9 deg. of Sagittarius
ascends, and 8 deg. of Libra culminates. The Sun, Mer-
cury, and Saturn, are angular in the 7th, from whence, I
say, there are a sort of uneasy people, that among, and in
evil societies, are always creating broils and troubles; the
hot headed, violent people make mutinies and quarrels, and
the innocent must suffer by it, as they always do. *Qui vult
vivere necesse est ut multa ferat*, says, Cardan, which
they always do.

IV. *Of the Autumnal Quarter.*

WHICH commences on the 23d day of September,
at 7 hours 50 min. in the morning, near which is the
and last Square of Saturn and Jupiter. *Of which (God
willing) more in my next.*

Of

PARTRIDGE, 1767.

Of the Eclipses for the Year, 1767.

THERE will be two eclipses to the inhabitants of the globe, and both of the greater Luminary, the Sun they will happen in the following order.

The first is on the 30th of January, at 7' past 5 in the morning, and therefore invisible to these parts of the earth but in some parts of Asia, and about the Torrid Zone, will be a great and visible Eclipse.

The second is on the 25th of July, at 8' past 7 in the evening, but by reason of the Moon's southern latitude will not be visible with us at London, but at the Brasils, and Peruvian Islands, it will be nearly total. But being invisible with us, I shall say no more of them, well knowing they are not hurtful where they are invisible.
